FORENSIC SCIENCES

Parent volunteers have fun sharing their work experiences...
in this case...one shared some forensic technics with students.

Did you know you can lift fingerprints from human skin?

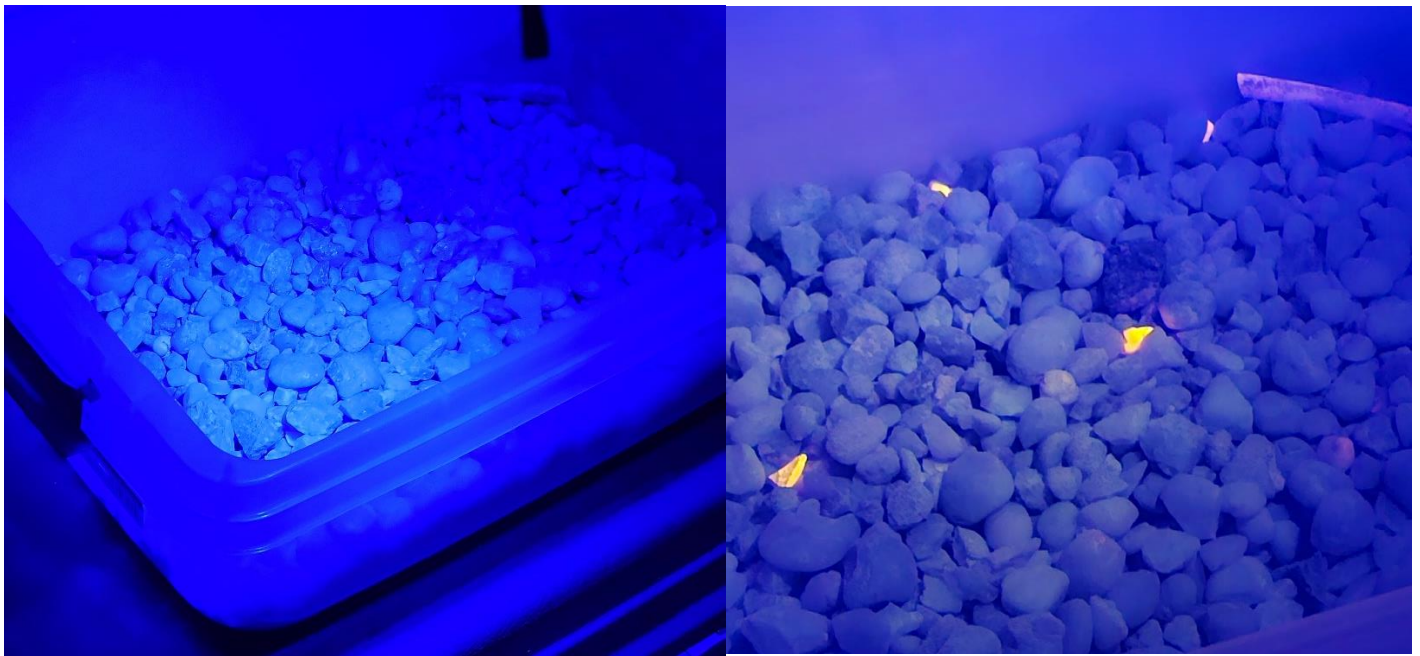

Some evidence is not easily seen unless you have...

Some cool orange glasses and...

...a little help from a UV light.

Watch the evidence “light up.”

*Parents: You never know when those baby teeth you saved from your kids will finally come in handy for a forensic demonstration!

*Chemistry students wanted to do a “field trip” as well to look for evidence. Little did they know they would end up in bathrooms!
